

EFFECT OF ENZYME PREPARATIONS ON PIGLETS

Z. Bartkevičiūtė, J. Černauskienė

Summary. Two-month-old weaning piglets and one-month-old suckling piglets were fed on a ration of barley with 0,5-1,0 g of enzyme preparations Bio-feed Pro CT and Bio-feed Alpha CT added.

The results of the experiments show that enzyme preparations gave better weight gain 9,8 % to 12,7 % compared with the control groups.
