

THE GROWTH KINETICS OF BOVINE FOETUS ORGANS IN PRENATAL PERIOD

A. Mlečkienė, I. Alionienė

Summary. A very intensive growth period of organs is observed in foetuses 5-7 months of age. The thymus increased 95 times, the left kidney - 21, the right kidney and the liver -18, the adrenal -10 times in a period from 3,5-4 months to 8 months of age.

In 8 month old foetuses Kastaldi index and percentage index to total weight are lower than in 3,5-4 month old foetuses.
