Summary. 5 field experiments were conducted in 1994–1998 during which the efficiency of Gabon PA 92 for Varroosis treatment was established. Based on five year data it was identified that the efficiency of the preparation was 98,6 % and it was similar to Apistan. It is recommended for use in Lithuanian apiaries.

Keywords: Varroosis, Gabon PA 92, Acrinathrin, Apistan, Fluvalinate, mite infestation of bees and brood.
