

## COMPUTERIZATION OF PIGS CONTROL FATTENING AND SLAUGHTER DATA ACCOUNT

Sigita Kerzienė, Vida Juozaitienė

**Summary.** Since the beginning of the year 2000 State Pig Breeding Enterprise (SPBE) has started to collect data of control fattening and slaughter of pigs. For this reason client program „Control fattening and slaughter of pigs“ was prepared in Laboratory of Animal Breeding Value Estimation and Biometry, in Department of Animal Breeding and Genetics. Program was realized on Windows Access database management system. Computer program „Control fattening and slaughter of pigs“ provides an opportunity to organize pigs' recording and to use analyses' results more effectively.

**Keywords:** control fattening and slaughter of pigs, client program, database.
